

DIYANA JAYASEKARA

SOFTWARE ENGINEERING UNDERGRADUATE

No:83 Pelakatiya Watta, Godakanda, Galle | [linkedin.com/in/diyana-jayasekara](https://www.linkedin.com/in/diyana-jayasekara)
(+94)704518909 | senadidiyana@gmail.com | github.com/Diyana

SUMMARY

Motivated second-year Software Engineering student at IIT Sri Lanka (affiliated with the University of Westminster, UK) with strong foundational skills in Python, Java, web development, and UI/UX design. Experienced in software development, applying Object-Oriented Programming (OOP) principles, and building real-world academic and personal projects with a focus on frontend development and backend development. Passionate about continuous learning and eager to contribute to innovative software solutions through teamwork, creativity, and technical expertise.

EDUCATION

BEng (Hons) Software Engineering

Sep 2024 – Present

Informatics Institute of Technology (IIT), Sri Lanka
Affiliated with the University of Westminster, UK

GCE (A/L) Examination

2023

Sanghamiththa Balika Vidyalaya, Galle
Physical Science Stream

- Combined Maths: C
- ICT: B
- Physics: S

GCE (O/L) Examination

2020

Sanghamiththa Balika Vidyalaya, Galle

TECHNICAL SKILLS

- **Languages:** Java, Python, HTML, CSS, JavaScript
- **Frameworks & Libraries:** Java Swing, ReactJS
- **Database Systems:** MySQL
- **Tools & Platforms:** Git/GitHub, Google Colab, Figma
- **IDEs:** IntelliJ, Visual Studio Code, Visual Studio, NetBeans, Eclipse

SOFT SKILLS

- Problem-solving skills
- Multitasking
- Focused and hardworking
- Self-motivation

ACHIEVEMENTS & EXTRACURRICULARS

- Awarded for selection into a government university under the Physical Science stream - 2024
- Member of the Aesthetic Band - 2016
- Member of the Rotaract Club of IIT - 2024
- Member of the Leo Club of IIT - 2024
- Member of the IEEE Club of IIT - 2025
- Member of the Science Society Sanghamiththa Balika Vidyalaya - 2023
- Event Volunteer - SHERlock 3.0 | IEEE Women in Engineering (WIE) of IIT - 2026

PROJECTS

Traamp – Mobile Application for Tourism

Software Development Group Project | Dec 2025 – Ongoing

Technologies: Flutter, Dart, Node.js, Firebase, REST APIs, Figma, Canva

- Developing a cross-platform tourism mobile application that connects SLTDA-certified tour guides with tourists in Sri Lanka, featuring verified guide profiles, location-based discovery, real-time maps using Google APIs, AI-assisted travel support, and secure Firebase authentication.

University Enrollment System

OOP Module Lab-Based Project | Dec 2025

Technologies: Java, Java Swing, JUnit

- Developed a desktop-based university enrollment system using Java, applying core OOP principles such as inheritance, encapsulation, and polymorphism. Designed a Java Swing GUI with data display, filtering, and sorting features, and used JUnit for testing to ensure reliability.

Feed the Future – Zero Hunger Awareness Website

Web Design & Development Group Project | Feb 2025

Technologies: HTML, CSS, JavaScript

- Developed key components of a responsive SDG-focused website using HTML, CSS, and JavaScript, including splash screen animations and a volunteer engagement page, ensuring accessibility, responsiveness, and alignment with the UN Zero Hunger goal.

Traffic Flow Data Analysis System | Nov 2024 – Dec 2024

Technologies: Python, CSV, Tkinter

- Designed a modular Python program featuring input validation, CSV data processing, loop-based dataset handling, file output generation, and GUI-based histogram visualization using a class-oriented Tkinter design.

Personal Portfolio Website | Dec 2025

Technologies: ReactJs, HTML, CSS, JavaScript

- Developed a responsive personal portfolio website to showcase projects, skills and academic background, featuring a modern UI, smooth navigation, and structured sections including About, Skills, Projects, Education and Contact and deployed using GitHub Pages for public access.

SkyNow – Weather Forecast Website | Jun 2025

Technologies: HTML, CSS, JavaScript, OpenWeatherMap API

- Developed a responsive weather website that retrieves and displays real-time weather data based on user input. Implemented API integration, input validation, dynamic UI updates, loading states, error handling, and weather icons to provide an interactive and user-friendly experience.

CERTIFICATES

- Java Essential Training – LinkedIn | May 2025
- Python for Beginners – University of Moratuwa | Apr 2025
- Web Design for Beginners – University of Moratuwa | Jun 2025
- React Essentials – LinkedIn | Aug 2025
- Postman API Fundamentals for Student Expert - Postman | Jul 2025
- Introduction to GitHub – Microsoft | Sep 2025
- AI/ML Engineer Stage 1 – SLIIT | Sep 2025
